WWW.ACESTAMPING.COM

Ace Stamping is the definition of a modern turnkey facility. With quick access to all of our dies, the manufacturing process begins right when the order is placed thus reducing the time it takes for an order to be completed. Our 76,000 square foot facility and its machinery allows us to handle any size job at any given time.

Utilizing the latest technology in hardware and software, Ace is able to track an order at any given moment ensuring traceability down to a single part in our entire facility, thus giving our customers the advantage of the exact status of an order.

Our facility offers our clients a variety of storage configurations for the largest and heaviest of dies. Our crane stacker system protects valuable tooling work and simplifies handling heavy items, speeds storage and retrieval and ends long waits for lift trucks.

Our large warehousing facility allows us to provide our customers with Just-In-Time Shipping.

Certified ISO9001 since 1996

RAISING THE INDUSTRIES STANDARDS ON QUALITY, PRICE AND DELIVERY.

Ace Stamping & Machine Co., Inc., has been supplying customers high-quality precision metal stampings for over five decades. Mixing experience with a fully modernized in-house tool room, we're setting the highest standards of efficiencies in the manufacturing of precision controlled metal stampings.

From day one, Ace takes a pro-active approach with every job that enters our building. Using a modernistic workflow process we're able to gain full control over each customer's metal stamping demands, from start to finish,

in return providing the highest quality product with rapid turn around times and competitive pricing.

Today's tooling environment has become more competitive than ever. The need to meet stricter tolerances, job complexities and tighter budgets have become, no longer a plus, but a must. Ace has the experience and technology to meet today's ever-changing tooling environment. We're eager to take on any challenge or job that comes our way.

THAT'S THE ACE WAY.

THE ACE GUARANTEE –
PROVIDING YOU WHAT
YOU WANT
WHEN YOU WANT IT
WITH A 98.5%
ON-TIME DELIVERY
RATE.

OFFERING A COMPLETE HANDS-ON METAL STAMPING PROCESS FROM START-TO-SHIP.

Ace Stampings modernistic start-to-ship process combines the latest technologies with a highly skilled and innovative staff, resulting in cost-effective, error-free metal stamping solutions from start to finish. Setting the industries highest standards in reliability with a 98.5% on-time delivery rate.

Our in-house tool rooms' engineering / design team has proven itself to be an economical means of getting parts into production. Having full control from design thru the entire manufacturing process results in a smooth, flawless job flow throughout the entire cycle.

Utilizing over 35 presses with tonnage ranging from 5 to 2000 tons ensures an efficient tooling process, allowing us to take on virtually any job size or type. Numerous automatic stamping lines allow quick-change overs as well as die protection systems to prevent costly repairs and downtimes.

Due to equipment and staff limitations its popular for our competitors to farm out secondary operations. Ace offers its customers a multitude of secondary operations, all in-house. Removing the middle-man not only saves time, but ensures products are delivered with Aces' highest quality standards.

Ace realizes that quality, time and delivery are highly important to our customers bottom line. Implementing advanced logistics from start-to-ship results in shipments arriving on time and damaged free. In addition, using progressive locator technology, we're able to trace all jobs in our entire facility down to a single part, giving our customers the advantage of the exact status of any order at any time.

Experience the start-to-ship process for your next metal stamping job and watch your concept come to life before your eyes.

EXPERIENCE THE START-TO-SHIP CONVENIENCE.
